Objective:

Looking for a position in the field of Project / Construction Management or Project Engineering in line with my educational background and work experience.

Work Experience: (2006-2026)

.....

With over 19 years of experience as a Sr. Civil Engineer with extensive experience in Project Construction/ Management, Interface Management, and Engineering.

My career has been defined by a diverse range of successful ventures in the field of infrastructure development. Over the years, I have had the privilege of supervising and executing a multitude of projects encompassing utilities, buildings, cabling, piping, gates, fences, roads, trenches, and the security systems that accompany them. What sets me apart is not just my technical proficiency but also, my adeptness at Interface Management.

My specialty lies not only in the execution of these projects but also in the seamless interface Management with an array of contractors, subcontractors, and vendors. This multifaceted experience has honed my skills in navigating complex projects and ensuring they are executed flawlessly while maintaining a keen focus on safety, efficiency, and quality. My ability to effectively bridge the gap between stakeholders has consistently facilitated project execution.

Furthermore, my extensive experience in utilities construction underscores my commitment to delivering excellence in this critical domain. My passion for civil engineering and my demonstrated skills make me a formidable force in the field, ensuring the success of any project I undertake.
